

TAILLE-HAIE

SH 60 PRO

SH 60 PRO

Professional electric hedge cutter for heavy use.

The hedge cutter can cut branches up to 27 mm with a two sided dual action blade. The new better balanced assymetric blade measures 60 cm.

It has a powerful 600-watt engine and a special gearbox, which changes down gear and creates an extra powerful turning/cutting torque.

The safety is high with a safety switch with 3 contacts and quick stop (max 0,5 sec.). An extra safety contact breaker enables you to hold underneath the hedge cutter and reach higher up.

The rounded handle always gives you a comfortable and safe grip.
